Release notes: R18.0, January 2018

New in Briox

New Product: Linked Documents

It is now possible to buy Linked Documents as a separate product

If you only want to link documents to your journals and supplier invoices your can now purchase the simplified product called Linked Documents. If you already have the Scanner / Archive, the Linked documents is part of that product.

The price for linked documents is only **5 £ / month**.

Accounting /Archive/ Linked Documents

Upload a file using "drag and drop"

It is now possible for all users with an Archive or Linked Documents module to upload a file directly in the journal or supplier invoice view of their Accounting. You can now upload both via the drag and drop functionality (simply drop the file in the linked document area) or the more traditional way, by choosing the file to upload.

The file immediately appears in the view as selected to be linked and all you need to do is click on **Save.** You can upload multiple files simultaneously.

The viewing has also been improved and you can now see all the documents you have linked to a supplier invoice or journal in the case that you have chosen to link multiple documents.
