

### Here is what is new in Fortnox:

You can read more about the various new functionalities in the Release Document section of the Help Centre.

## Invoicing/Accounting

---

### Improved Import Functionality

The following improvements have been implemented to the import functionality:

- New Supplier import Functionality
- Improved item, customer, supplier, journal imports with:
  - o Informative error message
  - o Delete information using empty fields of import
  - o Import history for every import tab
  - o Imports can be reverted
  - o Imports are logged in the activity log

*For more information read the attached Release documents: **Improved Import Functionality***

**Where:**

*Invoicing – Registry – Import Items/ Import Customers/ Import Suppliers  
Accounting – Accounting – Import Journals*

## Invoicing

---

### Improved mass management of customer invoices (previously released)

The Mass Management functionality has been reworked to be able to better manage customer Invoices.

- The mass management tab has been removed and the feature has been incorporated into the invoice list view under **Invoicing - Customer Invoices – List**.
- All mass management jobs are **queued**.
- Invoices with **attachments** can now be processed via mass management.

*For more information read the attached Release documents: **Reworked Mass Management***

**Where:**

*Invoicing – customer Invoices  
Reports – Queued jobs*
