

FORTNOX

Product Updates: R15.2, November 2015

Here is what is new in Fortnox:

You can read more about the various new functionalities in the Release Document section of the Help Centre.

The New User Interface

Fornox gets a brand new look in our first step towards simplifying our menus!

Read more about the new features in the attached Release notes. And see the films on our website.

New in Time

Mobile Notes

It is now possible for the user to enter comments when reporting Time and Expenses via the Mobile App. All comments entered in the application can be viewed in the mobile app and those entered in the mobile app can be viewed in the application.

Where: Mobile Time/Time

Status Column in Reports

When you run a Time Report for Week Sum or Day Sum, you now have the option to include a **Status** column to show whether a time entry is submitted, not submitted or approved.

Where: Time Reports

New in Sales

Possibility to Preview Reminders

A preview button has been added to the reminder view offering you the possibility to preview your reminders without affecting the reminder count.

Where: Sales - Reminders

FORTNOX

Product Updates: R15.2, November 2015

New in Purchases

PO Template update

In the new default Purchase Order printout template, the **Invoice address** is now the **Supplier's Address** (on the left) and the **Delivery Address** (on the right) is **Our Delivery Address**.

Where:

Purchases - Purchase Order

Purchases - Purchase Order - Print

New in Accounting

Banking

Several new functionalities have been added to Banking:

- You can now reconcile customer and supplier invoices and create payments from your bank statement, as well as reconcile journals and your bank accounts, and create journals directly from your uploaded bank statements.
- You can now even view your **account statement** in Fortnox.

Where: *Accounting - Banking*
